EDUCATION

ENSM — École Nationale Supérieure Maritime | Nantes, France
Naval Architecture & Marine Engineering (Génie Maritime) — Expected 2027

- Core modules: Naval Architecture, Computational Fluid Dynamics, Fluid Mechanics, Thermal Systems, Automatic Control Systems, Structural Analysis, Power Electronics, Stability, Maritime Safety Regulations (SOLAS, MARPOL)
- Hands-on CFD work using OpenFOAM on a Ubuntu environment; simulation post-processing with ParaView and Python

Preparatory Class PT — Physics & Technology | Lycée Lesage, Vannes — 2023–2025

- TIPE independent research project: experimental study of boat roll stabilisation using a physical scale model

Scientific Baccalaureate — Advanced Mathematics Option | Lycée Dupuy de Lôme, Lorient — 2023, Mention Bien

TECHNICAL SKILLS

CFD	OpenFOAM v2412 — mesh generation (blockMesh, snappyHexMesh), steady & transient solvers (simpleFoam, pimpleFoam), ParaView, Python post-processing
Naval Arch.	Rhino 3D, Orca3D — hull surface modelling, hydrostatics, intact stability, resistance to advancement
Dev & Tools	GitHub / Git, VS Code (Remote SSH + Agentic AI Copilot), Ubuntu 24.04, Python, Arduino
Maritime Reg.	SOLAS, MARPOL, RIPAM, SMCP, Coastal Skipper licence

ACADEMIC PROJECTS & PORTFOLIO

CFD Simulation — NACA-0012 Lifting Aerofoil | OpenFOAM | ENSM 2026

- End-to-end CFD study of a symmetric aerofoil at multiple angles of attack — mesh generation, steady-state and transient solver runs, turbulence modelling, lift and drag coefficient extraction, RANS
- Pressure coefficient (C_p) distribution analysis; comparison between stationary and unsteady flow regimes

Numerical Validation — Poiseuille Channel Flow | OpenFOAM | ENSM 2026

- Simulation of laminar viscous flow in a 2D channel; systematic grid convergence study; quantitative comparison of numerical velocity profiles against the analytical Hagen-Poiseuille solution, RANS

Gyroscopic Roll Stabiliser — Embedded Control | Arduino / IMU | ENSM 2026

- Design and implementation of a real-time PD controller for roll reduction on a physical model; IMU data acquisition, signal processing and performance logging

Engineering Portfolio — Web Development & Version Control | teddyensm.github.io

- Personal naval architecture portfolio, version-controlled with Git/GitHub; showcases CFD workflows, simulation results and project reports
- Managed development environment on Ubuntu via VS Code Remote SSH; automated deployment pipeline with GitHub Pages

PROFESSIONAL EXPERIENCE

Harbour Assistant — Compagnie des Ports du Morbihan | Lorient — Summer 2026

- Dry-stack marina operations: scheduling, launching, hauling and storage of pleasure craft; operation of handling equipment; direct customer relations in a technical environment

Sales & Logistics Assistant — Boulanger | Lorient — Summers 2024 & 2025

Retail Assistant — Snatch | Lorient — Summer 2023

LANGUAGES & INTERESTS

French Native **English** B2+ — professional & maritime vocabulary

Sailing & Offshore Racing — Passionate follower of the Lorient racing scene **Weightlifting · Biking · Football · Swimming**

Music — Drums & Alto (conservatory)

RESPONSIBILITIES & INVOLVEMENT

Class Representative - ENSM | Nantes 2025-2026

- Elected student representative; liaison between students and faculty on academic and organisational matters

Events Committee - ENSM | Nantes 2026-2027

- Member of the event pole : outreach, communication strategy and coordination of student events
